

SimplySnap: Easy Control for Your Sports Lighting

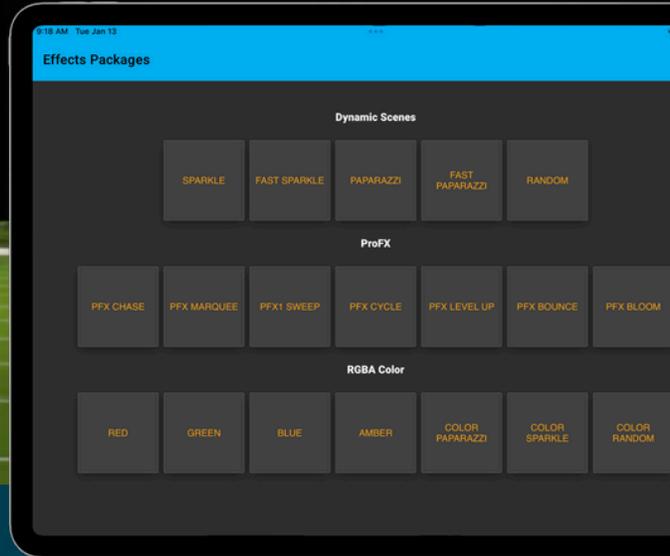

SimplySnap is a wireless sports lighting control solution that delivers reliable, competition-ready, and highly engaging environments for school campuses, recreational fields, collegiate complexes, and professional or semi-professional venues. Whether lighting a new facility or retrofitting an existing one, SimplySnap makes it easy to add advanced control, dynamic effects, and centralized management—without the cost and complexity of running new wires.

Built on a proven wireless mesh network, SimplySnap scales from a single field to large, multi-venue complexes. Lights can be logically grouped by pole, aiming direction, or use case, enabling tailored lighting behaviors for games, practices, player introductions, and special events. From subtle emphasis to high-energy lighting effects, SimplySnap enhances both on-field performance and the fan experience.

SimplySnap Advantages

- **Simple to Use.** Easy navigation and fast access to the controls that matter
- **Scales to Any Site.** One platform for small buildings, large campuses, or multi-site properties
- **Vendor Agnostic.** Works with virtually any fixture - new install or retrofit
- **U.S. Based Support.** Remote commissioning, training, and expert technical help
- **Highly Interoperable.** Connects with BACnet/Modbus, UDP Triggers, APIs, and Lutron Athena

An intuitive Interface for Everyday Use

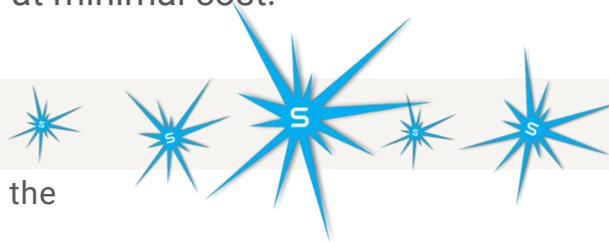

SimplySnap Effects bring game-day excitement to any field—without the cost of traditional show lighting. Dynamic Effects provide affordable, celebratory effects like Papparazzi, Sparkle, and Random, while ProFX adds broadcast-style motion and synchronization across the field for a true stadium experience at a fraction of the cost.

Dynamic Effects

For cost-conscious facilities, the Dynamic Scenes license unlocks simple but powerful effects like Papparazzi, Sparkle, and Random, giving customers an easy way to add celebration moments, player intros, and post-game energy at minimal cost.

PAPPARAZI / FAST PAPPARAZI

All fixtures randomly turn on to create a camera flash effect on the playing surface. All lights in the zone emulate busy flash bulbs.

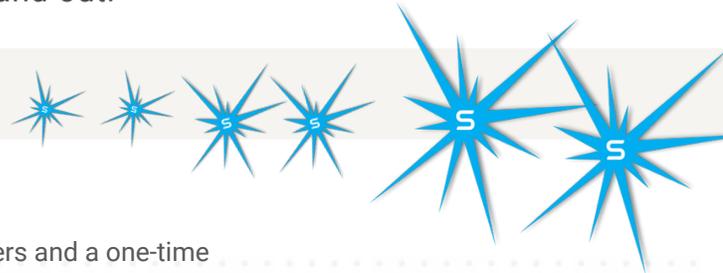

SPARKLE / FAST SPARKLE

All fixtures randomly turn off to create a sparkling effect on the playing surface. All lights in the zone randomly fade in and out.

RANDOM

All lights in the zone cycle through random levels.

Note - Requires compatible Synapse controller, fast switching LED Drivers and a one-time license. See page 7 for a list of compatible controllers.

ProFX

For venues looking to step up to a broadcast-style experience, ProFX delivers synchronized, field-wide lighting effects that move across poles, arrays, and the entire field—creating the kind of dynamic visuals typically seen on TV, but using the same wireless controllers already installed in each fixture.

CHASE

Each pole turns off briefly in sequence, creating a circular “chase” motion around the field as the dark spot moves from pole to pole in a clockwise or counterclockwise direction.

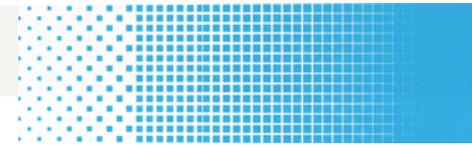

MARQUEE

Lights across the field flash in alternating vertical bands, creating a marquee-style pattern that feels dynamic and stadium-like, even on smaller fields.

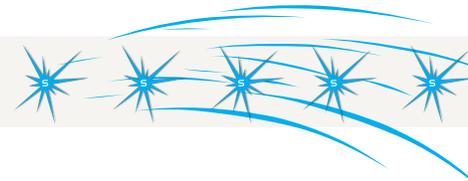

SWEEP

All lights begin off, then illumination washes smoothly across the field from one end to the other, as if light is being swept across the turf in a single continuous motion.

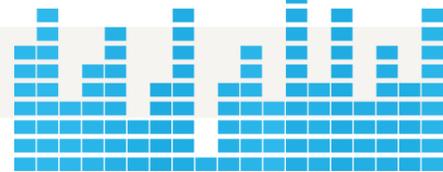

CYCLE

Lights on each pole cycle in sequence from one side of the pole to the other, creating motion within the light array itself rather than across the field.

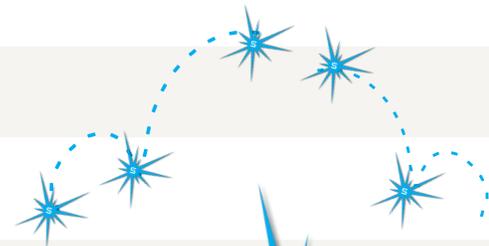

LEVEL UP

Light intensity rises and falls across the field in horizontal bands, similar to a graphic equalizer, creating a pulsing, vertical movement of light.

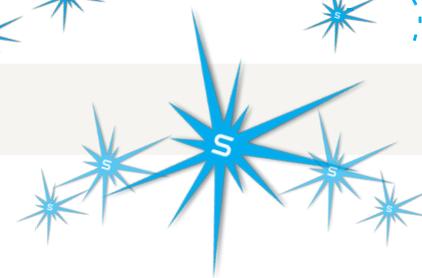

BOUNCE

A moving band of light travels across the field and then reverses direction, bouncing back and forth from end to end for a high-energy effect.

BLOOM

Light expands to the center of the field from both ends of the field simultaneously, growing brighter toward the center until the entire field is illuminated—like light blooming open from the sidelines.

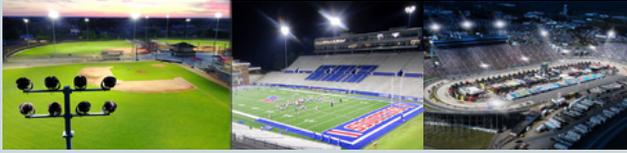

Note - Requires compatible Synapse controller, fast switching LED Drivers and a one-time license. See page 7 for a list of compatible controllers.

All ProFX & RGBA Color effects require an additional one-time license and a SimpySnap Cloud Pro Subscription.

SYNAPSE

KEY APPLICATIONS

OUTDOOR APPLICATIONS

- + Municipal Sports Complexes
- + K-12 Sports Fields
- + Collegiate Sports Fields
- + Professional Sports Fields

INDOOR APPLICATIONS

- + Indoor Sports Facilities
- + Arena Sports
- + Gymnasiums
- + Indoor Practice Fields

“Our lighting system completely transformed the game-day experience. With dynamic colors and scenes for touchdowns, timeouts, and halftime — all controlled right from my phone — it’s incredibly easy to use and delivers a professional, unforgettable experience for our fans and athletes.”

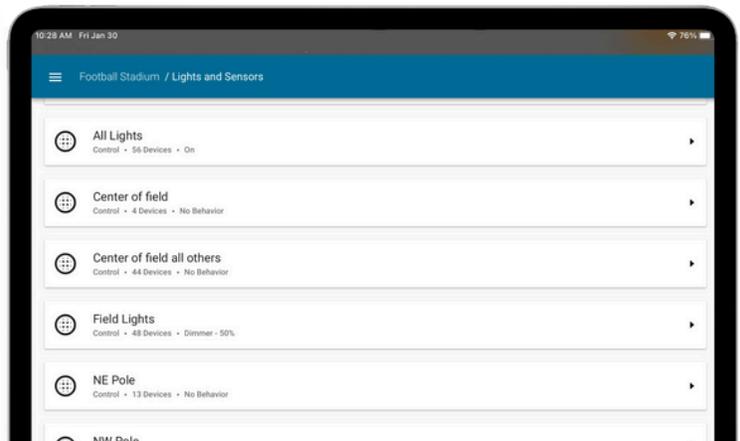

SIMPLYSNAP FEATURES

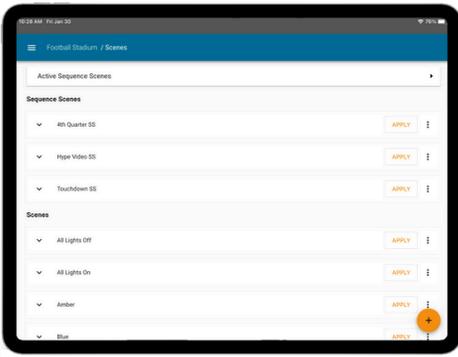

Game-Day Control

SimplySnap's map-based interface provides fast, easy access to your sports lighting needs from anywhere. Adjust lights, activate scenes, or create schedules all from a user interface that was designed to be easy to learn and easy to use.

Smart Zoning

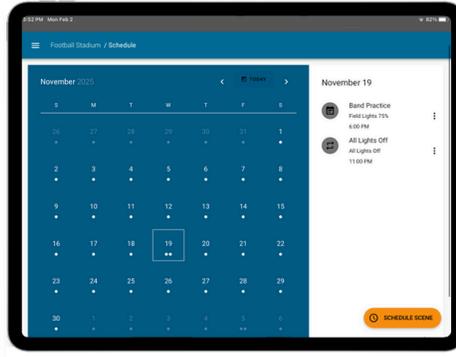

Lights can be organized and managed in easy-to-understand zones, supporting multiple sports fields or specific areas (End zone, Court 3, Softball Field 2, etc.).

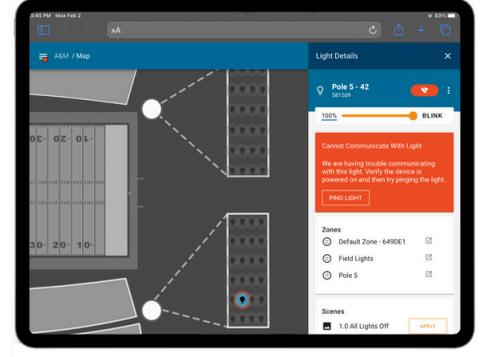

Create the Moment

Set or schedule lighting scenes across multiple zones with one click, then turn those scenes into automated sequences. Scenes can be applied from the user interface or applied to switch buttons.

Season-Long Automation

The built-in calendar feature allows scenes to be scheduled for one-time events or for recurring events over several years. Create schedules for practices and games for the entire season to automate control.

On-Site Alerts

SimplySnap continuously monitors fixtures locally and can detect issues such as power loss or fixture failures in real time. These local alarms provide immediate visibility on-site, allowing staff to quickly identify and respond to problems—often before they impact a game, practice, or event.

One-Touch Lighting Control

Program physical buttons for direct control of light levels or to activate saved Scenes, Dynamic Scenes, or ProFX. Push buttons can also be disabled to prevent after-hours lighting control.

OTHER SOFTWARE FEATURES

- + Multiple applications: Easily manage parking lots, garages, and pathway lights in addition to the sports lights system
- + User Account Levels: Different user account levels restrict system access and control, providing basic users with only the tools they need.
- + High-end Trim: Reduce energy use by adjusting the maximum light levels across the system.
- + Sensor Support: Use Occupancy and Photocell sensors to manage behaviors across groups of lights.
- + Task Tuning: Granular control to adjust light levels in specific areas of the field or venue
- + UDP Triggers: Control SimplySnap from external systems, such as scoreboards or AV systems.

SIMPLYSNAP CLOUD FEATURES

SimplySnap Cloud extends sports lighting control beyond the site, enabling operators to manage fields, trigger scenes, and respond to issues from anywhere. Cloud Connect provides secure remote access to the system, while Cloud Pro unlocks advanced sports lighting capabilities including multi-field management, ProFX and color control, Scene Views, and proactive email alerts. For a complete breakdown of features and subscription options, see the [SimplySnap Cloud Solution Brief](#).

Purpose-Built Dashboard

Scene Views allow customers to take a large list of configured scenes and organize them into purpose-built control views, so users only see the scenes they actually need. This makes game-day operations faster, reduces complexity, and helps limit access based on user roles.

Dynamic Color & ProFX

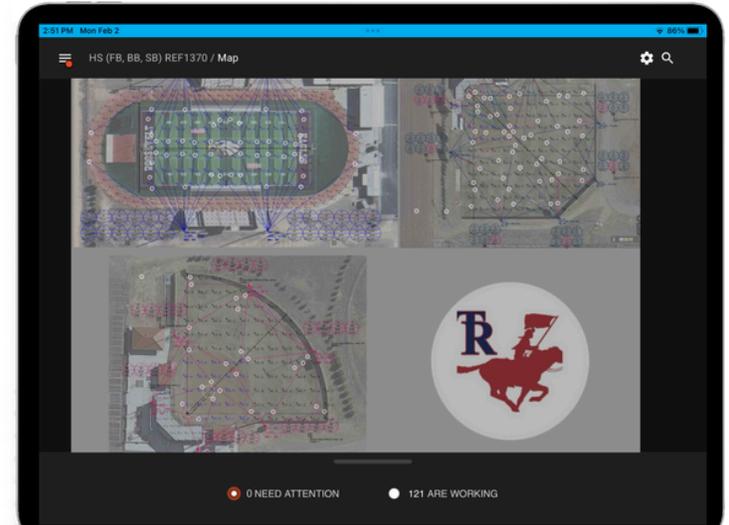

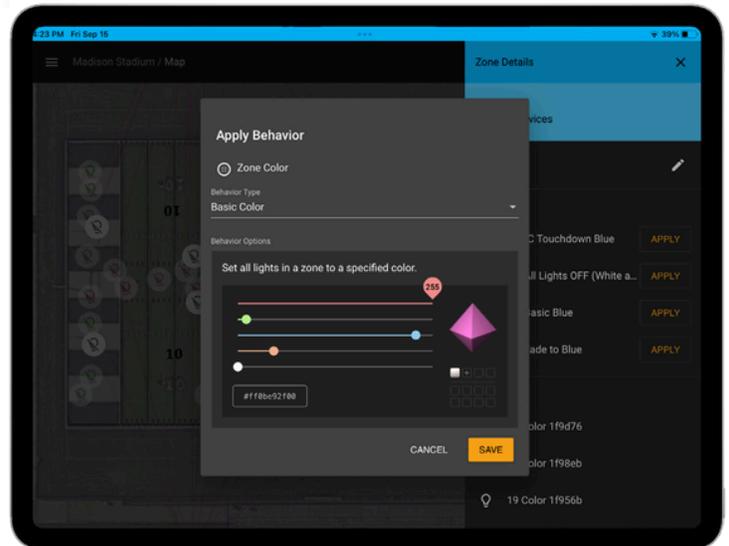

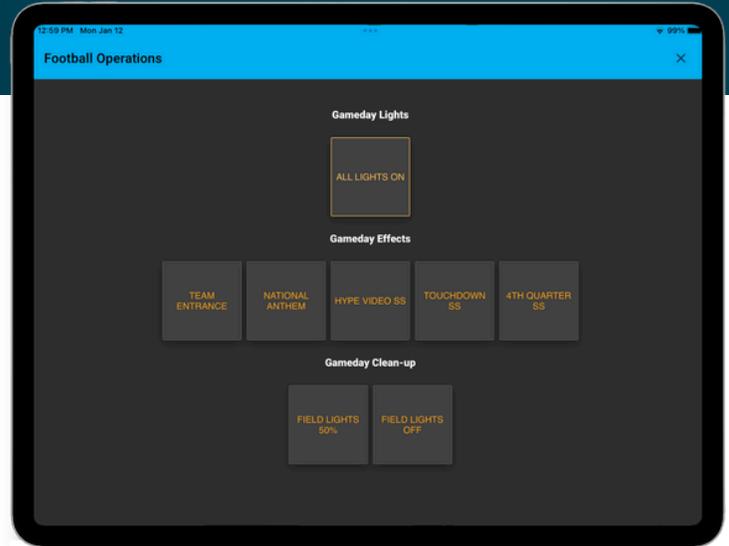

SimplySnap Cloud enables RGBAW color control with custom color mixes applied to static and dynamic effects. ProFX expands these capabilities with seven advanced dynamic field effects optimized for sports lighting applications.

Anywhere Access

With SimplySnap Cloud, access your lighting system from anywhere using our Progressive Web App. When a wired network connection isn't available, SimplySnap supports built-in cellular connectivity—included with the service.

Proactive Issue Alerts

SimplySnap Cloud automatically detects fixture and system issues and sends email alerts to designated users. These remote notifications enable fast response across single or multi-site deployments—often resolving problems before they impact games or events.

HARDWARE COMPONENTS

Site Controller

The CBS Site Controller is the operational hub of a SimplySnap sports lighting system, coordinating communication across all wireless luminaires in the mesh network. It manages zones, scenes, and schedules for games, practices, and special events, monitors system health, and ensures lighting changes execute reliably when timing matters most.

CLOUD-BASED LIGHTING SOFTWARE - OPTIONS

Part #	Description
SimplySnap Cloud Pro	
Includes One Cellular Access line for One Gateway, Progressive web app, map-based management, RGBW Capabilities; Multi-site management; Single UI across multiple gateways; Different user access levels; Database backup; Power dashboard	
LM-BASE	1 Year Subscription to Cloud Pro Lighting Management Package
LM-BASE-3Y	3 Year Subscription to Cloud Pro Lighting Management Package
LM-BASE-5Y	5 Year Subscription to Cloud Pro Lighting Management Package
LM-BASE-10Y	10 Year Subscription to Cloud Pro Lighting Management Package
<i>Includes basic remote access to one gateway via one cellular access line</i>	
SimplySnap Cloud Connect	
Includes basic remote access to one gateway via one cellular access line	
LM-REMOTE	1 Year Subscription to Cloud Connect Remote Access Package
LM-REMOTE-3Y	3 Year Subscription to Cloud Connect Remote Access Package
LM-REMOTE-5Y	5 Year Subscription to Cloud Connect Remote Access Package
LM-REMOTE-10Y	10 Year Subscription to Cloud Connect Remote Access Package
Added Annual Subscriptions for Additional Cellular Gateways	
CS-GW-ADD	1 Year Subscription to Cellular Service for 1 Additional Gateway to Site
CS-GW-ADD-3Y	3 Year Subscription to Cellular Service for 1 Additional Gateway to Site
CS-GW-ADD-5Y	5 Year Subscription to Cellular Service for 1 Additional Gateway to Site
CS-GW-ADD-10Y	10 Year Subscription to Cellular Service for 1 Additional Gateway to Site
Per Site One-Time Charges	
SSDB-001	SimplySnap Dynamic Effects Lifetime License
SSUDP-01	SimplySnap UDP Trigger Integration Lifetime License
Can Only Be Used With SimplySnap Cloud Pro Subscription	
SER-COLOR*	RGBW Color Lifetime License
PRO-FX	License for up to 7 ProFX effects, including sweep, chase, bounce, cycle, level up, marquee, and bloom.
SER-PROFXDEV	Design and Commissioning Services for the Pro-FX License - 1 Field Only
SER-PROFXDEV2	Pro-FX Commissioning For Additional Fields/Stadiums
Sports Combo Lifetime License Packages	
SPORT-001*	Dynamic Effects and RGBA License Package
SPORT-002*	Dynamic Effects, RGBW and ProFX License Package (SER-PROFXDEV is still needed for ProFX)
SPORT-003*	ProFX and RGBW License Package
SPORT-004*	ProFX and Dynamic Effects License Package

Note* - RGBA Color Control requires D4i LED Drivers or SimplySnap compatible color drivers.
